15" x 25" Downdraft Table

DESCRIPTION

This Benchtop Downdraft Sanding Table provides a simple and economical solution to capturing the dust created by portable hand sanders. The low profile allows one or more tables to sit on top of the workbench during sanding operations and then store out of the way when not needed. Internal baffles and slotted table surface maximize air movement and dust control.

W1756

5 HP Shaper

DESCRIPTION

This 5 HP Spindle Shaper is sized to handle large raised-panel doors and extra-wide moulding profiles. With three included spindle sizes (3/4", 1", 1 1/4") and four spindle speeds ranging from 3600 RPM to 10,000 RPM, choosing the right shaper cutter for the job will never again be a problem. The long spindle lengths also allow total flexibility for running tall cutters or stacking multiple cutters and spacers. Its heavy cast-iron split adjustment fence lets you dial in just the right amount of offset for edge profiling, and the heavy cast-iron table and stable base are made for the toughest jobs. This Shaper is made for production!

2 HP Benchtop Table Saw with Stand

DESCRIPTION

The W1875 Benchtop Table Saw boasts a 2 HP motor to power through your ripping, crosscutting, and miter cutting needs. The built-in folding stand offers easy portability and quick setup at job sites, and all accessories mount directly to the saw body for easy transport and storage. The extension table expands up to 27" wide for ripping large workpieces. The handwheel performs two functions as it adjusts the blade height from 0-3-1/2". It rotates clockwise to raise blade; rotate counterclockwise to lower blade. Push it inward and rotate to adjust the angle blade from 0°-45°. Rotating the micro-adjustment knob finely adjusts the distance between the aluminum fence and the blade.

9" Benchtop Bandsaw

DESCRIPTION

Our benchtop bandsaw has a combination of features including an efficient 1/3 HP motor, LED work light, deluxe extruded aluminum fence, and a rack-and-pinion table tilt system. The blade guard is also rack-and-pinion, making adjustment an easy one-handed operation. The quality design and construction of this bandsaw assures easy, accurate cuts including fine detailed cuts without the vibration found in other benchtop models. Accepting 62-inch blades 1/8" to 3/8" wide, this benchtop bandsaw can cut pieces up to 3-5/8" thick. The blade guides are dual ball bearing and the wheels are adjustable for quick alignment and coplanarity.

5 pc. Carbide Forstner Bit Set, 15mm - 35mm

DESCRIPTION

This Roman Carbide Forstner Bit Set includes 15, 20, 25, 30, and 35mm forstner bits. Each bit features two cross tips and center cutter for smoother, faster and chatter free cutting. Hex shanks will not slip and fit 3/8 inch drill chucks. Micro-grain carbide cross tips and center cutter stay sharp longer and can be resharpened for years of dependable service. Ideal for drilling hard and soft woods, face grain, end grain and figured grain.

6" x 10" Mini Metal Lathe

DESCRIPTION

M1015 Shop Fox 6" x 10" Mini Metal Lathe is perfect for the mini machine shop enthusiast. The M1015 6" x 10" Mini Metal Lathe from Shop Fox is a fantastic lathe for someone who wants a durable and well-designed machine that can fit in a small location. This mini lathe gives toolmakers, gun hobbyists, and the weekend machinist a way to economically produce small precision parts, threaded parts, fittings, and dies. The M1015 has all the features and precision required for small-scale turning and has proven to be a hugely popular machine for scale model building. It includes a 3" three-jaw chuck, and a full selection of optional accessories is also available for a wide variety of setups.

Wood / Metal Bandsaw

DESCRIPTION

A VFD (Variable Frequency Drive) with digital readout provides infinitely variable blade speeds between 150 and 3000 FPM, making this saw great for cutting wood and metal alike! Just turn the speed control dial to set the perfect cutting speed for each type of material you're cutting. Besides providing the variable-speed control, the VFD also allows this machine to take full advantage of the high-torque/low-speed characteristics of a 3-phase motor while only requiring a single-phase power supply. The vertical cutting configuration and massive cast-iron table also makes it easy to feed intricate, curved cuts.

52" Sheet Metal Shear

DESCRIPTION

Cut your work down to size with this heavy-duty shear! The M1117 Sheet Metal Shear cuts up to 52" wide with all the stability and precision you would expect from a machine this size. The front stop and angle guide are quickly adjusted by wing nuts on the top of the stops. The rear extension arms have micro-adjusting stops that allow you to fine tune your cut length. For those really large sheet metal jobs this shear includes table gauges and front extension arms. Additional features include a heavy cast-iron body with foot control, precision ground blade, spring activated hold down, and a safety guard.

48" Pan and Box Brake

DESCRIPTION

The M1118 48" Pan and Box Brake will take care of your heavy-duty box bending. It will easily set a full-width angle in 18-gauge mild steel up to 135 degrees; 16-gauge at half-width. This equipment has a minimum reverse bend of 7/16" and can set a maximum height of 2-1/2" pan/box brake sides. It comes with sixteen removable steel fingers for box forming and other special bending operations. The precision-ground fingers can be used individually or all at once. The adjustable brake handle is counterweighted for leverage.
